

Project Management

Areas of Assessment	Weightage	No Evidence (0 mark)	Below Expectation (1 mark)	Basic (2 marks)	Average (3 marks)	Good (4 marks)	Excellent (5 marks)	Score
Project Planning and Tracking	8	No evidence of project management skill	Able to identify all required project activities and resources correctly, but unable to plan and create tasks for the project implementation schedule.	Able to identify all required project activities and resources correctly, as well as to plan and create tasks for the project implementation schedule. The candidate needs help in managing time and resources to achieve goals.	Able to identify all required project activities and resources correctly, as well as to plan and create tasks for the project implementation schedule. The candidate occasionally needs help in managing time and resources to achieve goals.	The candidate plans and manages time and resources in an efficient manner to achieve goals. Able to distinguish critical and non-critical tasks correctly Able to anticipate project problems and suggest solutions or workarounds	Effective consultation with supervisor. The candidate has exceptional project management skills.	
Attitude and Professionalism	8	Poor attitude	No observable or little interest and effort shown in the project undertaken	Persisted in making repeated attempts based on supervisor recommendation (without own initiative).	Demonstrate initiative under supervisor's guidance.	Exhibits a strong focus, passion and commitment toward the project	Exhibits a strong focus, passion and commitment toward the project, Acts pro-actively, self-motivated, driven by self-initiatives.	
Technical competency	4	Does not comprehend project's technicalities.	Able to explain at least 30% of project's technicalities.	Able to explain at least 50% of the project's technicalities; unable to identify technical limitations	Able to explain at least 80% of the project's technicalities; Able to identify some technical limitations.	Able to explain all project's technicalities and overcome associated technical limitations.	Overall, able to explain all project's technicalities as well as think and act creatively or innovatively to find clues and ideas to solve the technical problems.	

Project Analysis and Design

Areas of Assessment	Weightage	No Evidence (0 mark)	Below Expectation (1 mark)	Basic (2 marks)	Average (3 marks)	Good (4 marks)	Excellent (5 marks)	Score
Problem Statement; Project Objective; Expected Findings/Deliverables	2	No evidence of problem statement and project objective.	Problem statements and project objectives are listed and described.	Problem statements, project objectives, expected findings (research-based) or deliverables (application based and application & research based) are listed and described.	Problems statements, project objectives, expected findings (research-based) or deliverables (application-based and application & research based) are listed and described clearly.	Problem statements, project objectives expected findings (research-based) are sound, revealing, reasonable and achievable . The deliverables (application-type) are interesting, challenging, novel, reasonable and achievable .	Overall, the language and contents of this section is beyond expectation .	
Literature Review OR Background Study	8	No literature review or background study is provided .	The literature review or background study is poorly written and disorganized . Lacks relevance to the project with minimal or no connection to key concepts. Fails to demonstrate an understanding of related work.	The literature review or background study is somewhat understandable but lacks depth. Provides limited explanation of existing work related to the project. Insufficient coverage of key theories, concepts, or studies..	The literature review or background study is relevant and covers key topics related to the project. Demonstrates an understanding of current research but lacks comprehensive analysis . Sources are somewhat current, with moderate relevance to the project objectives.	In addition to the previous level: The literature review or background study is clearly written, logically organized , and easy to follow. Ideas flow smoothly with strong connections between concepts. Demonstrates critical analysis of sources, highlighting relationships between key works.	In addition to the previous level: Demonstrates exceptional depth and breadth in the analysis and discussion of key issues. Integrates high-quality, relevant, and diverse sources with strong comparative analysis. Shows advanced synthesis of ideas, offering insightful connections, critiques, and perspectives. Sources are well-organized, current, and support a comprehensive understanding of the topic.	
Conceptual Framework OR Requirements Gathering, Data Collection and Analysis	6	Conceptual Framework: No framework is provided. No attempt to outline concepts, relationships, or theoretical foundations. Requirements/Data Collection: No evidence of requirements gathering, data collection, or analysis activities.	Conceptual Framework: Framework is unclear, incomplete, or lacks structure. Fails to demonstrate how key concepts relate to the research objectives. Requirements/Data Collection: Requirements are vague or irrelevant. Minimal data collected with poor documentation. No clear methodology for analysis.	Conceptual Framework: Basic framework is presented but lacks depth. Limited explanation of key variables, relationships, or theoretical underpinnings. Weak connection to research goals. Requirements/Data Collection: Basic requirements identified but not fully detailed. Data collection methods are described but lack thoroughness. Superficial analysis with limited insights.	Conceptual Framework: Framework is clear and relevant to the project. Identifies key concepts and their relationships, though lacks critical analysis or integration of theories. Requirements/Data Collection: Requirements are mostly complete and relevant. Data collection methods are appropriate, with some attention to accuracy and reliability. Analysis provides moderate insights but lacks depth.	Conceptual Framework: Framework is well-structured, logically organized, and clearly linked to research objectives. Demonstrates good integration of key theories and concepts with evidence of critical thinking. Requirements/Data Collection: Comprehensive and detailed requirements that align with project goals. Data collection methods are systematic and well-documented. Analysis is thorough with clear interpretation of findings.	Conceptual Framework: Framework is exceptionally detailed and insightful, showcasing advanced critical thinking and synthesis of theories. Clearly articulates complex relationships among concepts with strong justification. Requirements/Data Collection: Requirements are exhaustive, precise, and fully aligned with project objectives. Data collection is rigorous, employing best practices to ensure accuracy and reliability. Analysis is sophisticated, providing deep insights, well-supported conclusions, and clear relevance to the project.	
Significance of Study OR Solution Design & Methodology	4	Significance of Study: No explanation of the study's importance. Lacks any mention of potential contributions to knowledge, practice, or society. Solution Design & Methodology: No evidence of a proposed solution, design process, or methodology. Missing key details on how the project will be developed or implemented.	Significance of Study: Weak or unclear description of the study's significance. Limited awareness of the research's value with vague statements that lack relevance. Solution Design & Methodology: Solution is poorly described with minimal structure. Methodology lacks coherence, showing no clear process, tools, or techniques for implementation.	Significance of Study: Some attempt to explain the study's importance, but lacks depth. Contributions are superficial, with limited connection to research gaps or societal needs. Solution Design & Methodology: Basic solution outline with limited detail. Methodology is present but lacks clarity on steps, tools, or techniques. Inconsistent alignment with project goals.	Significance of Study: The study's importance is explained with moderate clarity. Key contributions are identified and show some relevance to the application domain. There is a partial connection to existing research gaps or practical needs, though the discussion could be further strengthened and contextualized. Solution Design & Methodology: The solution design is generally appropriate and relates to the project objectives. The methodology describes the main steps, tools, and techniques with acceptable clarity, although some details are underdeveloped. Alignment with project goals is mostly evident, but explanations lack depth or refinement in certain areas.	Significance of Study: The study's significance is adequately explained with clear relevance to specific fields or practical applications. Some connection to existing gaps in knowledge or real-world issues. Solution Design & Methodology: Solution design is logical and addresses project goals. Methodology outlines key processes with reasonable clarity, covering tools, techniques, and procedures, though with limited innovation.	Significance of Study: Strong justification of the study's importance, clearly highlighting its contribution to academic knowledge, practical applications, or societal impact. Demonstrates awareness of current research gaps. Solution Design & Methodology: Well-structured, detailed, and coherent design. Methodology is methodical, applying relevant frameworks, tools, and techniques effectively. Shows a clear connection between the solution and project objectives.	

Structure of Document

<u>Areas of Assessment</u>	<u>Weightage</u>	<u>No Evidence</u> (0 mark)	<u>Below Expectation</u> (1 mark)	<u>Basic</u> (2 marks)	<u>Average</u> (3 marks)	<u>Good</u> (4 marks)	<u>Excellent</u> (5 marks)	<u>Score</u>
Spelling, grammar, and punctuation	4	Incomprehensible writing.	Makes repeated grammatical and syntactical errors; frequently misspells; distract from understanding.	Errors are less than 50% and do not interfere with reading and understanding.	Errors are less than 20% and do not interfere with reading and understanding.	Writes generally correct prose ; occasionally fails to catch minor grammatical errors.	Proofreads well enough to eliminate most grammatical errors	
Writing Style and organization (overall effectiveness of communication in written form)	5	Incomprehensible writing.	Sentence structure, word choice, and lack of sequencing of ideas make reading difficult to follow; lack of appropriate sections or many items are in the wrong section.	Sentence structure and/or word choice sometimes interfere with clarity; sequencing of ideas within paragraphs and transitions between paragraphs need to be improve to make reading easy to follow; Some of the information is in the wrong section.	Sentence structure and/or word choice somewhat interfere with clarity but sequencing of ideas within paragraphs and transitions between paragraphs make reading easy to follow; Organization of information is generally correct but still has room for improvement.	Sentences are structured and words are chosen to communicate ideas clearly; sequencing of ideas within paragraphs and transitions between paragraphs make reading easy to follow.	Overall, the language and contents of this section is beyond expectation .	
Figures, tables, and graphs	5	No relevant figure, table and graph.	Less than 30% compliance to required format; captions are ineffective in communicating content; ineffective visual representation; exhibit little understanding of important features or issues in the explanation.	At least 50% compliance to the required format; captions are ineffective in communicating content; some of the data being visualized ineffectively ; important features or issues are not communicated well in the explanation.	At least 80% compliance to the required format; captions are effective in communicating content; data is being visualized and interpreted effectively but important features are not communicated well in the explanation .	Correct format of figures, tables, and graphs; captions effectively communicate content; data is being visualized and interpreted effectively; important features are noted in the explanation .	Correct format of figures, tables, and graphs; captions effectively communicate content; data is being visualized effectively; all visualizations are effectively interpreted and discussed in the report.	
Proper Abbreviations, Citations & References (APA Referencing Style)	4	No evidence of reference	Less than 30% compliance to required format; More than 80% of the references are incomplete, insufficient, out dated or not relevant.	Less than 50% compliance to required format; More than 50% of the references are incomplete, insufficient, out dated or not relevant.	Less than 80% compliance to required format; More than 30% of the references are incomplete, insufficient, out dated or not relevant.	Minimum formatting error. Almost all the references are complete, sufficient, updated and relevant .	Correct format. All references are complete, sufficient, updated and relevant .	
Appendices	2	No appendices are included in the report. Missing essential supporting documents, data, or supplementary materials.	Appendices are present but poorly organized and difficult to navigate . Contains irrelevant or unnecessary materials. Lacks proper labeling, making it unclear how the appendices relate to the main content.	Some relevant supporting materials are included but may be incomplete or disorganized. Formatting is inconsistent, and labeling may not be clear. The appendices provide limited additional value to the project.	Appendices contain relevant materials that support the main content. Documents are somewhat structured and labeled, but clarity and organization could be improved. Some effort has been made to include references to the appendices within the main report.	Appendices are well-organized, properly labeled, and clearly referenced in the main report. Contains a variety of relevant supporting materials such as raw data, questionnaires, interview transcripts, additional charts, or technical documentation. Formatting is mostly consistent, making the appendices easy to read and navigate.	Appendices are highly relevant, comprehensive, and well-structured. Materials are clearly labeled and consistently formatted, making navigation effortless. All included items significantly enhance the report by providing strong supporting evidence, detailed raw data, technical diagrams, or supplementary documents. There is a clear connection between the appendices and the main report, with proper in-text references ensuring seamless integration	

Oral Presentation

a. Area of Assessment: Vocal Delivery, Organization and Materials (Weight: 10)

No	General	Specific	Description	Count (0 or 1)
1	Material	Opening & etc.	Appropriate opening slide , with title, date, names, (candidate, supervisor, moderator), etc. is provided.	
2			Slide layout, background, slide elements and text (font size and highlight) are appropriately chosen	
3			Appropriate references are made to other resources where required	
4			Viewer experience is such that the presentation materials communicates the overall project well	
5			Words are well selected and used correctly in the presentation materials	
6		Content	Outline of the main topics to be covered in the presentation is provided	
7			Ideas and concepts in the presentation sequence are linked and logically coherent	
8			Main description of the project is presented (introduction, overview of the project, objectives and problem statements, motivations, justifications, scope, literature review/background study, etc.).	
9			Design and implementation plan are presented	
10			Specific methods, techniques, algorithms , unique or novel features are highlighted.	
11		Q & A	More than 50% of the questions were responded .	
12			The answers demonstrate the presenter having a good and rounded knowledge on the subject matter.	
13			Use of words reflects having good grounded knowledge on the subject matter	
14	Delivery	Organization & Effectiveness	Choice of words and spoken sentences are appropriate	
15			Clarifications and explanations of key points are good	
16			No major interruptions or problems (hiccups) during the presentation	
17		Style & pacing	Spoken words are clear and concise with appropriate pauses and breaks	
18			Speech volume and tone are appropriate	
19			Engagement with the audience is good (eye contact, audience nodding, etc.)	
20		Time Management	Time duration spent for delivery of key points are appropriate	
			TOTAL POINTS (Maximum = 10 points)	0

b. Area of Assessment: Prototype/Proof-of-Concept/Simulation Demonstration (Weight: 10)

No	Description	Count (0 or 1)
1	The basic prototype/ proof-of-concept /simulation is demonstrated .	
2	Major challenges for the entire project have been identified.	
3	The prototype/ proof-of-concept /simulation is technically sound .	
4	The prototype/ proof-of-concept /simulation demonstrated is aligned to the objectives/deliverables defined in the project.	
5	The prototype/ proof-of-concept /simulation demonstrated shows assuredness that the work belongs to the student .	
6	All activities to address the identified challenges are properly planned for the entire project.	
7	The risks for all activities in the entire project have been identified and assessed. Mitigation measures have also been created.	
8	Based on evidence of current work progress, the project assessor believes that the proposed overall implementation schedule for Phase 2 is reasonable and achievable.	
9	The proposed solutions and the implementations (what to do and how to do them exactly) are clearly explained and found to be achievable.	
10	Overall, the project assessor is satisfied with the ensuing explanations and clarifications, and confidently believes that the whole project will be a success by the end of Phase 2	
	TOTAL POINTS (Maximum = 10 points)	0
