

**CPT6314 Project (FYP1) Meeting Log**  
**Trimester: MARCH / APRIL 2026 (Trimester ID:2610)**

|                                          |                                                                    |               |                                                                                               |               |                                                                               |
|------------------------------------------|--------------------------------------------------------------------|---------------|-----------------------------------------------------------------------------------------------|---------------|-------------------------------------------------------------------------------|
| Meeting Date:                            | 27/05/2026                                                         | Meeting No.:  | 4                                                                                             | Meeting Mode: | <input type="checkbox"/> In-Person <input checked="" type="checkbox"/> Online |
| Project ID:                              | 985                                                                | Project Type: | <input type="checkbox"/> Research-based <input checked="" type="checkbox"/> Application-based |               |                                                                               |
| Project Title:                           | Machine Learning-Based System for Cardiopulmonary Sound Separation |               |                                                                                               |               |                                                                               |
| Student ID:                              |                                                                    | Student Name: | AL-SALOUL, ASHRAF ALI HUSSEIN                                                                 |               |                                                                               |
| Student Programme and Specialisation:    | Bachelor of Computer Science (Hons.) / Software Engineering        |               |                                                                                               |               |                                                                               |
| Supervisor Name:                         | Arshad Jamal                                                       |               |                                                                                               |               |                                                                               |
| Co-Supervisor Name: (if applicable)      | N/A                                                                |               |                                                                                               |               |                                                                               |
| Collaborating Company: (if applicable)   | N/A                                                                |               |                                                                                               |               |                                                                               |
| Company Supervisor Name: (if applicable) | N/A                                                                |               |                                                                                               |               |                                                                               |

**1. WORK DONE**

[Please write the details of the work done, after the last meeting]. Tasks (tick):

☒ Background study      ☐ Implementation      ☐ Testing      ☒ Evaluation  
☐ Commercialisation Proposal      ☒ Research Paper      ☒ Draft Report      ☐ Final Report

Details (max 3-5 bullet points):

- Revised the problem statements and objectives.
- Updated the literature review and matrix.
- Inserted the PRISMA screening figure.
- Refactored the report to match the application-based format.
- Started converting Chapter 3 into Requirements Analysis.

**2. WORK TO BE DONE**

[Please write the details of the work to be done, before the next meeting]. Tasks (tick):

☐ Background study      ☒ Implementation      ☐ Testing      ☒ Evaluation  
☐ Commercialisation Proposal      ☐ Research Paper      ☒ Draft Report      ☐ Final Report

Details (max 3-5 bullet points):

- Complete Chapter 3 Requirements Analysis.
- Prepare the Google Form questionnaire.
- Develop Chapter 4 system design diagrams.
- Define the main prototype functions.
- Check formatting, citations, and appendices.

**3. PROBLEMS ENCOUNTERED AND SOLUTIONS**

[Please write the details of the problems encountered, after the last meeting and provide the solutions / plan for the solutions]

The report structure did not fully match the application-based FYP format.

**Solution:** The report was reorganized into Requirements Analysis, System Design, Implementation Plan, and Conclusion.

**4. COMMENTS (Supervisor / Co-Supervisor / Company Supervisor)**

☐ Not Satisfactory ☒ Satisfactory

Steady progress being made. Need to list all the functional and non functional requirements in detail to draft the chapter 3.

Student's Signature

Supervisor's Signature

Arshad Jamal  
Lecturer  
Faculty of Computing and Informatics  
Multimedia University, Persiaran Multimedia  
63100 Cyberjaya, Selangor Darul Ehsan

Co-Supervisor's  
Signature (if applicable)

Company Supervisor's  
Signature (if applicable)

**IMPORTANT NOTES TO STUDENTS:**

- Items 1 – 3 are to be completed by the students prior to the meeting. Item 4 is to be completed by the supervisor / co-supervisor / company supervisor.
- Student must upload the soft copies of the meeting logs and attach them along with final (FYP2) report. Minimum requirement is SIX Meeting Logs (Period: Week 4 to Week 14). Students can have fortnightly meetings with the supervisor.
- Log sheets provide the basis for evaluating the General Effort (Project Management, Attitude, and Technical Competency) of the student, by the supervisor and for checking the attendance requirement of the student, by the FYP Committee. This also provides the student with feedback from the supervisor / co-supervisor / company supervisor on the tasks done and provides the plan for the upcoming tasks. This can provide the motivation for the student to give consistent and efficient effort throughout the period of FYP.
- Student who fails to meet the minimum requirement (six nos.) of log sheets will not be allowed to submit FYP report.
